

The **Care Quality Commission (CQC)** used to refer to “Standards 14, 16, 17, and 18” under the **Essential Standards of Quality and Safety** (from the **Health and Social Care Act 2008** Regulations).

Although the CQC now regulates using the **new framework (the Single Assessment Framework)**, these standards are still often referenced — especially in older training materials, audits, and compliance documentation.

Here’s a summary of what **CQC Standards 14, 16, 17, and 18** covered:

Standard 14 – Supporting Workers

Regulation 23: Supporting workers

- Staff must receive appropriate support, training, professional development, supervision, and appraisal.
- Providers must ensure workers are competent to carry out their role safely and effectively.
- Regular supervision and opportunities for development should be in place.

Example: Staff receive training in safeguarding, moving and handling, infection control, and are supervised regularly.

Standard 16 – Assessing and Monitoring the Quality of Service Provision

Regulation 10: Assessing and monitoring the quality of service provision

- Providers must have systems to regularly assess and improve the quality and safety of their services.
- They should gather feedback from people who use services, staff, and others.
- Risks should be identified and managed through continuous improvement.

Example: Regular audits, satisfaction surveys, and incident reviews.

Standard 17 – Complaints

Regulation 19: Complaints

- Service users must know how to make a complaint and feel confident to do so.
- Providers must have an effective and accessible complaints procedure.

- Complaints should be handled promptly, investigated fully, and outcomes shared with the complainant.

Example: A complaints policy is displayed clearly, and all complaints are logged and reviewed for learning.

■ Standard 18 – Notifications – Death of a Service User

Regulation 16: Notification of death of a service user

- Providers must notify the CQC without delay if a service user dies while receiving care.
- The notification should include the cause and circumstances of death (where known).

Example: A care home reports to the CQC when a resident passes away, following proper procedure.

CQC INTERVIEW CHEAT SHEET (2025)

◆ The 5 Key Questions (CQC Framework)

Key Question	Meaning	Example You Can Say
Safe	People are protected from abuse and avoidable harm.	“We complete risk assessments, follow safeguarding procedures, and ensure medication is administered safely.”
Effective	Care achieves good outcomes and staff are competent.	“I ensure staff are trained, supervised, and care plans are reviewed regularly.”
Caring	Staff treat people with kindness, dignity, and compassion.	“I promote respect, privacy, and always use person-centred language.”
Responsive	Services meet people’s individual needs.	“We adapt care plans, respond to feedback, and support people’s choices.”
Well-led	Leadership ensures a positive, learning culture.	“I encourage openness, reflective practice, and quality improvement.”

◆ CQC Fundamental Standards (Legal Requirements)

Regulation	Standard	Key Idea
9	Person-centred care	Tailored to the person's needs and preferences.
10	Dignity and respect	People are treated with kindness and respect.
11	Need for consent	Always gain valid consent before providing care.
12	Safe care and treatment	Manage risks and medicines safely.
13	Safeguarding	Protect people from abuse or improper treatment.
14	Nutrition and hydration	Meet people's dietary and hydration needs.
15	Premises and equipment	Safe, clean, suitable environment.
16	Receiving and acting on complaints	Encourage feedback and respond promptly.
17	Good governance	Monitor, audit, and improve quality of care.
18	Staffing	Sufficient, trained, supported staff.
19	Fit and proper persons employed	Safe recruitment checks.
20	Duty of candour	Be open and honest when things go wrong.

◆ Common Interview Questions & Example Answers

1. "How do you ensure care is person-centred?"

"I involve individuals and their families in planning and reviewing care. I listen to their preferences, document them clearly, and adapt care plans as their needs change."

2. "What does 'Safe' care mean to you?"

"It means protecting people from harm by following risk assessments, infection control, and safeguarding policies. Safety is everyone's responsibility."

3. "How do you handle a complaint?"

"I listen carefully, remain calm and respectful, document it, and follow our complaints procedure. I then share learning outcomes to improve our service."

4. "How do you support your team?"

"Through supervision, training, mentoring, and positive feedback. I also lead by example and promote a culture of openness and learning."

5. "What makes a service 'Well-led'?"

"Strong leadership, good communication, accountability, and a culture that encourages staff and service users to speak up and improve care."

◆ Top Tips Before Your Interview

- ✓ Review your service's **last CQC report** – be ready to talk about improvements.
- ✓ Use **real examples** of how you've met the standards.
- ✓ Mention **audits, training, safeguarding, and team support**.
- ✓ Show passion for **person-centred care and dignity**.
- ✓ End answers with **positive outcomes**: "...which improved safety / satisfaction / staff morale."

HEALTH & SOCIAL CARE INTERVIEW GUIDE (2025)

◆ 1. Understand What the Interviewer Is Looking For

Most care interviews test three main areas:

Area	What It Means	What to Show
Knowledge	Understanding of CQC standards, safeguarding, confidentiality, and care values.	Talk confidently about the CQC's 5 Key Questions and Fundamental Standards.
Skills	How you apply your knowledge in real situations.	Give practical examples — "Tell me about a time when..."
Values	Your attitude and approach to people who use services.	Show empathy, respect, teamwork, and honesty.

◆ 2. Key Topics You Must Know

- ✓ **CQC Framework** — 5 Key Questions: Safe, Effective, Caring, Responsive, Well-led
 - ✓ **Fundamental Standards** — Person-centred care, Dignity, Consent, Safety, Governance, Staffing, Duty of Candour
 - ✓ **Safeguarding** — What it is, types of abuse, and how to report concerns
 - ✓ **Mental Capacity Act (MCA) & Deprivation of Liberty Safeguards (DoLS)**
 - ✓ **Confidentiality & Data Protection (GDPR)**
 - ✓ **Infection Control** — Hand hygiene, PPE, risk assessment
 - ✓ **Equality, Diversity & Inclusion**
 - ✓ **Whistleblowing and Duty of Candour**
 - ✓ **Teamwork and Communication**
-

◆ 3. Common Interview Questions & Sample Answers

1 Tell me about yourself.

“I’ve been working in care for [X years], supporting individuals with [type of needs]. I’m passionate about person-centred care and ensuring people maintain dignity and independence.”

2 What does person-centred care mean to you?

“It means seeing each person as an individual, respecting their preferences, and involving them in decisions about their care.”

3 How do you promote dignity and respect?

“I knock before entering rooms, use preferred names, protect privacy during personal care, and encourage independence where possible.”

4 What would you do if you suspected abuse?

“I would report my concern immediately to my line manager or safeguarding lead, record it accurately, and follow the safeguarding policy. I would never ignore it or confront the alleged abuser.”

5 How do you handle a complaint?

“I listen calmly, apologise where appropriate, and follow the complaints procedure — recording the issue and ensuring it’s investigated and feedback is given.”

6 What does ‘duty of candour’ mean?

“Being open and honest when something goes wrong — informing the person or their family, apologising, and taking steps to prevent it from happening again.”

7 How do you keep information confidential?

“By storing records securely, discussing personal information only with relevant staff, and never sharing details outside the workplace.”

8 How do you ensure safety in your workplace?

“Following risk assessments, infection control, and health and safety procedures. I also report hazards or incidents immediately.”

9 What makes a good team member?

“Someone who communicates well, supports others, shares learning, and keeps a positive attitude.”

10 How do you deal with challenging behaviour?

“I stay calm, use de-escalation techniques, try to understand the trigger, and keep everyone safe. Then I record and report the incident.”

◆ 4. Scenario Questions (Think STAR Method)

Use the **STAR Technique** for structured answers:

- **S** – Situation: what happened
- **T** – Task: what needed to be done
- **A** – Action: what *you* did
- **R** – Result: what the outcome was

Example:

“A resident refused medication (Situation). I needed to ensure their safety (Task). I calmly explained why it was important, offered choice, and respected their decision (Action). Later, I informed the nurse and recorded it (Result).”

◆ 5. Questions You Can Ask the Interviewer

Always prepare 1–2 thoughtful questions. For example:

- “How do you support staff with professional development and training?”

- “How do you ensure the service continues to meet the CQC’s Key Questions?”
- “What qualities do you value most in your care team?”

Key Differences: Health and Social Care Act 2008 vs 2018

In Simple Terms:

2008 Act	2018 Act (update)
Set up the CQC and basic regulations for safe, effective care.	Focused on integration, partnership working, and system improvement .
Made sure providers were registered and inspected .	Made sure services work together and share accountability .
Focused on minimum standards .	Focused on continuous improvement and transparency .

How to Use This in an Interview

You could say something like:

“The 2008 Act established the CQC and the legal standards providers must meet — that’s our foundation for safe and effective care. The 2018 updates focus more on integration between health and social care, data sharing, and transparency — so we now work more collaboratively with NHS and local authorities to deliver joined-up, person-centred care.”

Types of Diabetes (Simplified for Care Settings)

Type 1 Diabetes

Type 2 Diabetes

Gestational Diabetes

Other, Less Common Types

Key Signs & Symptoms of Diabetes

High Blood Sugar (Hyperglycaemia) Low Blood Sugar (Hypoglycaemia)

Thirst, tiredness, frequent urination	Shakiness, sweating, dizziness
Blurred vision, slow wound healing	Confusion, irritability
Nausea	Fainting or collapse (in severe cases)

In an Interview, You Could Say:

“There are two main types of diabetes — Type 1, where the body can’t make insulin, and Type 2, where the body doesn’t use insulin properly. In care, it’s important to monitor for signs of high or low blood sugar, follow the care plan, support with diet and medication, and report any concerns promptly.”

Key Principles in Supporting People with Mental Health Conditions

1. **Person-Centred Care:** Respect individual needs, preferences, and goals.
2. **Safety:** Monitor for self-harm or aggression.
3. **Empathy & Respect:** Listen, reassure, and validate feelings.
4. **Consistency:** Maintain routines and clear communication.
5. **Collaboration:** Work with families, mental health teams, and other professionals.
6. **Confidentiality:** Respect privacy while following safeguarding rules.

◆ Interview Tip

When asked about mental health in an interview, you could say:

“Mental health affects how people think, feel, and behave. Common conditions include anxiety, depression, bipolar disorder, and schizophrenia. In care, it’s important to support individuals safely, follow care plans, provide emotional support, and work with mental health professionals to ensure their well-being.”

General Interview Tips

1. **Use STAR Technique** for scenario questions: Situation → Task → Action → Result.
2. **Show empathy and person-centred care** in your answers.
3. **Mention safety, reporting, and following care plans** as your priority.
4. **Give a real-life or hypothetical example** to demonstrate understanding.

Example Answer for Interview:

“I recently supported a resident with anxiety who became very distressed during mealtimes. I calmly reassured them, encouraged deep breathing exercises, and informed the nurse about the triggers. Over time, with consistent support, the resident became more relaxed during meals, showing that person-centred strategies can really improve wellbeing.”

Mental Health Care: Key Actions & Interview Examples

Mental Health Type	Key Care Actions	Interview-Ready Example Answer
Anxiety Disorders	- Provide reassurance and calm environment - Encourage coping strategies (breathing, mindfulness) - Observe triggers and report worsening symptoms	"I support people with anxiety by keeping the environment calm, encouraging coping strategies, and reporting any changes to ensure they feel safe and supported."
Depression	- Encourage social interaction and daily routines - Offer emotional support - Monitor for self-harm or low mood	"I notice changes in mood and encourage engagement in activities, listening empathetically and alerting the nurse if I see any risk of self-harm."
Bipolar Disorder	- Monitor for mood swings - Ensure safety during manic episodes - Support medication adherence	"I track mood changes and help maintain routines. If someone shows manic behaviour, I keep them safe and inform the care team immediately."
Schizophrenia / Psychotic Disorders	- Provide calm, structured support - Avoid confrontation - Follow care plans and report changes	"I stay calm and structured, follow care plans, and report hallucinations or unusual behaviour to ensure timely professional support."
Personality Disorders	- Set clear boundaries - Be consistent and predictable - Encourage coping strategies	"I provide clear, consistent boundaries while supporting coping techniques, helping the person maintain safe relationships and routines."
PTSD	- Offer trauma-informed care - Avoid triggers where possible - Support coping strategies	"I provide a safe space, avoid potential triggers, and encourage grounding techniques, working closely with the mental health team."
Eating Disorders	- Support safe eating and hydration - Observe for physical/emotional issues - Encourage therapy adherence	"I monitor meals and hydration, observe for signs of distress, and support therapy or diet plans as outlined in their care plan."

Mental Health Type	Key Care Actions	Interview-Ready Example Answer
OCD	- Respect safe routines when possible - Encourage coping strategies - Support therapy and medication adherence	“I respect safe routines, encourage alternative coping strategies, and support the person in following their treatment plan.”

Learning Disabilities & Autism – Key Care Guide

1. Learning Disabilities (LD)

Definition:

A **learning disability** is a condition that affects how a person **understands information, learns new skills, and copes independently**. It can range from mild to profound.

Common Examples:

- Down Syndrome
- Fragile X Syndrome
- Intellectual Disability

Key Care Actions:

- Use **simple, clear language** and repeat instructions if needed.
- Support with **daily living skills** (cooking, personal care, money management).
- Encourage **independence** while providing **safe supervision**.
- Observe for **changes in health, mood, or behaviour**.
- Work closely with **families, speech and language therapists, and multi-disciplinary teams**.

Interview-Ready Example:

“I support individuals with learning disabilities by using clear instructions, encouraging independence, and observing for any changes in health or behaviour, ensuring they are safe and supported to live as independently as possible.”

2. Autism Spectrum Disorder (ASD)

Definition:

Autism is a **neurodevelopmental condition** that affects communication, social interaction, and behaviour. Everyone with autism is different; strengths and challenges vary widely.

Key Features:

- Difficulty with social communication and understanding social cues.
- Repetitive behaviours or routines.
- Sensory sensitivities (sound, light, touch).
- Strong interests or focus in specific areas.

Key Care Actions:

- **Respect routines** and provide **predictability**.
- Use **visual aids, signs, or gestures** to support understanding.
- Avoid **sensory overload** (reduce noise, bright lights, crowds).
- Encourage **social skills gently**, respecting individual comfort levels.
- Collaborate with families and specialists for **personalised support**.

Interview-Ready Example:

“When supporting someone with autism, I respect their routines, provide clear communication, and reduce sensory triggers. I also work closely with their support network to ensure their environment feels safe and predictable.”

When asked about supporting people with learning disabilities or autism, you can say:

“I focus on understanding each person’s needs, using clear communication, respecting routines, and encouraging independence. I also observe carefully for any changes and work closely with families and the care team to ensure they feel safe and supported.”

Health & Social Care Interview Questions & Example Answers

1. Person-Centred Care

Q1: “What does person-centred care mean to you?”

Answer: “It means understanding each individual’s needs, preferences, and goals, and involving them in decisions about their care. For example, I supported a resident who preferred morning baths rather than evenings, and we adapted their schedule to respect their choice.”

Q2: “How do you make sure the people you care for feel involved?”

Answer: “I actively listen, ask for their opinions, and ensure care plans reflect their preferences. For instance, I involved a resident in choosing meals and activities, which improved their engagement and satisfaction.”

2. Safeguarding and Safety

Q3: “What would you do if you suspected abuse?”

Answer: “I would follow the safeguarding policy, report the concern to my line manager or safeguarding lead immediately, and document the details accurately. For example, when I noticed unexplained bruising on a resident, I reported it and supported the safeguarding investigation.”

Q4: “How do you manage risk while promoting independence?”

Answer: “I balance safety with independence by assessing risks, using supervision, and adapting activities. For example, I encourage a resident to cook meals with support rather than doing everything for them.”

3. Mental Health

Q5: “How would you support someone with anxiety?”

Answer: “I provide a calm environment, reassure them, and use coping strategies like deep breathing. For example, I supported a resident during a loud fire drill by staying with them, explaining what was happening, and encouraging relaxation techniques.”

Q6: “How would you support a person with depression?”

Answer: “I encourage engagement in activities, provide emotional support, and observe for any self-harm risks. For instance, I helped a resident gradually participate in group activities, boosting their confidence and mood.”

4. Learning Disabilities & Autism

Q7: “How do you support someone with a learning disability?”

Answer: “I use clear instructions, break tasks into manageable steps, and encourage independence. For example, I supported a resident learning to manage their finances by guiding them step by step and celebrating their progress.”

Q8: “How do you support someone with autism?”

Answer: “I respect routines, reduce sensory overload, and use visual aids. For instance, I helped a resident transition to a new activity by showing pictures and explaining the steps, which reduced anxiety.”

5. Physical Health / Long-Term Conditions

Q9: “How do you support someone with diabetes?”

Answer: “I assist with blood sugar monitoring, follow care plans, and observe for hypo- or hyperglycaemia. For example, I supported a resident in checking their blood sugar and ensuring they had quick sugar available if needed.”

Q10: “How do you support mobility or physical care?”

Answer: “I follow safe moving and handling procedures, encourage independence, and monitor for fatigue or discomfort. For instance, I use hoists correctly and encourage residents to walk short distances where safe.”

6. Medication and Procedures

Q11: “How do you ensure medication is given safely?”

Answer: “I follow the care plan and the ‘five rights’ of medication — right person, drug, dose, route, and time. I document accurately and report any concerns immediately.”

Q12: “What do you do if a person refuses medication?”

Answer: “I respect their choice, explain the benefits calmly, and record the refusal while informing the nurse or line manager.”

7. Teamwork & Communication

Q13: “Give an example of when you worked well in a team.”

Answer: “I collaborated with colleagues to manage a busy shift, dividing tasks fairly and communicating clearly, ensuring all residents received their care on time.”

Q14: “How do you handle conflict at work?”

Answer: “I stay calm, listen to everyone’s perspective, and aim to find a solution. For example, I mediated a disagreement about task responsibilities by discussing workloads and adjusting assignments fairly.”

8. Dealing with Challenging Behaviour

Q15: “How do you handle aggressive or challenging behaviour?”

Answer: “I remain calm, give space, use de-escalation techniques, and follow the care plan. For instance, I supported a resident who was agitated by speaking softly and redirecting them to a preferred activity.”

9. Continuous Improvement & CQC

Q16: “How do you contribute to improving care?”

Answer: “I participate in audits, reflect on practice, and report suggestions. For example, I suggested changes to a daily routine that improved residents’ participation and satisfaction.”

Q17: “What do you know about CQC and fundamental standards?”

Answer: “CQC inspects services against five key questions: Safe, Effective, Caring, Responsive, and Well-led. The Fundamental Standards ensure people receive safe, high-quality, person-centred care, and staff are supported and trained.”

Stroke (CVA – Cerebrovascular Accident)

Definition:

A stroke occurs when **blood flow to the brain is interrupted**, either by a clot (ischemic) or bleeding (haemorrhagic). Brain cells are damaged due to lack of oxygen.

Common Signs (FAST):

- **F** – Face drooping
- **A** – Arm weakness
- **S** – Speech difficulty
- **T** – Time to call emergency services

Other Symptoms:

- Confusion or trouble understanding
- Sudden numbness or weakness
- Vision problems
- Loss of balance or coordination

Key Care Actions (Health & Social Care):

1. **Recognise symptoms quickly** and call emergency services immediately.
2. **Monitor vital signs** if trained (BP, pulse, breathing).
3. **Support mobility** and safe transfers post-stroke (physio guidance).
4. **Encourage independence** with daily activities as much as possible.

5. **Observe for complications** (pressure sores, swallowing difficulties, emotional changes).
6. **Emotional support** — stroke can be frightening and affect mood.

Interview Example:

“I know the FAST signs of a stroke and would act immediately by calling emergency services. Post-stroke, I support mobility, encourage independence, and provide emotional reassurance while monitoring for complications.”

Heart Attack (Myocardial Infarction – MI)

Definition:

A heart attack occurs when **blood flow to part of the heart muscle is blocked**, usually due to a blood clot. Part of the heart muscle can be damaged or die.

Common Symptoms:

- Chest pain or pressure (may radiate to arm, jaw, or back)
- Shortness of breath
- Sweating, nausea, or vomiting
- Dizziness or fainting
- Pale or grey skin

Key Care Actions (Health & Social Care):

1. **Call emergency services immediately.**
2. **Keep the person calm and seated/lying comfortably.**
3. **Monitor vital signs** if trained (pulse, breathing, level of consciousness).
4. **Loosen tight clothing** and reassure the person.
5. **Administer medication** if prescribed and trained (e.g., aspirin).
6. **Record events accurately** and communicate to paramedics upon arrival.

Interview Example:

“If someone shows signs of a heart attack, I would act fast by calling 999, keeping the person calm and comfortable, monitoring their condition, and providing reassurance until emergency services arrive.”

When asked about stroke or heart attack in an interview, you could say:

“I understand that recognising the signs early is vital. For stroke, I look for FAST symptoms and act immediately. For a heart attack, I ensure emergency services are called, keep the person calm and comfortable, monitor their condition, and provide reassurance. I always follow care plans and record all observations accurately.”

Health and Safety – Care Guide for Interviews

Definition:

Health and Safety in care settings ensures the **wellbeing of staff, residents, and visitors** by preventing accidents, injury, or harm.

1. Key Responsibilities of Care Workers

1. **Follow Policies and Procedures**
 - Adhere to your workplace's health and safety guidelines.
 - Understand and use risk assessments.
 2. **Safe Moving and Handling**
 - Use correct techniques to prevent injury.
 - Use hoists, wheelchairs, or other equipment safely.
 3. **Infection Control**
 - Wash hands regularly.
 - Use Personal Protective Equipment (PPE).
 - Dispose of waste safely.
 4. **Fire Safety**
 - Know evacuation routes.
 - Participate in fire drills.
 - Raise alarms promptly in emergencies.
 5. **Environmental Safety**
 - Report hazards (spills, broken equipment, wet floors).
 - Keep areas clean and clutter-free.
 6. **Reporting and Record-Keeping**
 - Report accidents, incidents, or near-misses.
 - Complete accurate records and follow escalation procedures.
-

2. Common Health and Safety Risks in Care

Risk	How to Manage	Interview Example
Slips, trips, falls	Keep floors clear, use non-slip footwear, assist residents	"I ensure floors are clear and support residents during walking or transfers to prevent falls."
Manual handling injuries	Use correct lifting techniques, equipment	"I always follow moving and handling procedures, using hoists when necessary."
Infection	Hand hygiene, PPE, cleaning	"I follow strict hand hygiene protocols and wear PPE to prevent the spread of infection."
Fire or emergency	Know evacuation plan, raise alarm	"During drills, I assist residents calmly and ensure everyone follows evacuation procedures."
Medication errors	Follow 'five rights' of medication	"I check the right person, dose, time, route, and medication, and report any issues immediately."

3. Interview-Ready Example Answers

Q1: “How do you ensure health and safety at work?”

“I follow all policies and procedures, use correct moving and handling techniques, ensure infection control with PPE, and report hazards immediately. For example, I once noticed a wet floor in the dining area and quickly cordoned it off to prevent a resident from slipping.”

Q2: “What would you do if there was an accident?”

“I would ensure the person is safe, provide first aid if trained, call for help if needed, and report the incident according to policy. I would document all details accurately for follow-up.”

Q3: “How do you manage risk while promoting independence?”

“I assess risks first, use safe equipment, and provide supervision where needed. For example, I encourage residents to walk with a walking aid rather than taking over completely, so they maintain independence safely.”

Comprehensive Health & Social Care Interview Questions

1. CQC & Care Standards

1. What are the **five key questions** the CQC uses to inspect services?
 2. Can you explain what **Fundamental Standards** are and why they are important?
 3. How do you ensure care is **safe** and meets CQC standards?
 4. How do you **promote person-centred care** in your day-to-day work?
 5. What does **duty of candour** mean and how would you apply it?
 6. How would you handle a **complaint** from a service user or their family?
 7. How do you ensure **staffing levels and skills** meet the needs of residents?
 8. Can you give an example of contributing to **quality improvement** in your workplace?
-

2. Health and Social Care Act (2008 vs 2018)

9. What are the main differences between the **Health and Social Care Act 2008 and 2018**?
 10. How does the **2018 Act** affect the way care teams work together?
 11. How does **integration of health and social care** improve outcomes for service users?
 12. How would you ensure your work complies with **legal and regulatory requirements**?
-

3. Mental Health

13. Can you describe the **common types of mental health conditions** you may encounter?
14. How would you support someone with **anxiety**?
15. How would you support someone with **depression**?
16. How do you help individuals with **bipolar disorder or psychosis**?
17. How would you respond to **challenging behaviour related to mental health**?
18. How do you ensure your care is **person-centred** for someone with a mental health condition?

4. Learning Disabilities & Autism

- 19. How do you support someone with a **learning disability** in daily life?
- 20. How do you support someone with **autism** in social or daily activities?
- 21. How do you communicate effectively with people who have **learning disabilities or autism**?
- 22. How do you ensure **independence and safety** for individuals with learning disabilities?
- 23. Give an example of how you would manage **sensory overload** for someone with autism.

5. Diabetes

- 24. What are the **different types of diabetes** and how do they differ?
- 25. How would you support a resident with **Type 1 diabetes**?
- 26. How would you support a resident with **Type 2 diabetes**?
- 27. What are the **signs of hypoglycaemia and hyperglycaemia**, and what would you do?
- 28. How do you ensure a diabetic resident maintains a **healthy lifestyle**?

6. Stroke & Heart Attack

- 29. What are the **FAST signs of a stroke**, and what would you do?
- 30. How do you support a resident **post-stroke** with mobility and daily living?
- 31. What are the **common symptoms of a heart attack**, and what is your immediate action?
- 32. How would you provide **emotional support** to someone experiencing a heart attack or stroke?

7. Health and Safety

- 33. How do you **ensure health and safety** in your workplace?
- 34. How do you **manage risks** while promoting independence?
- 35. How would you respond to an **accident or emergency** in a care setting?
- 36. How do you prevent **infection and cross-contamination**?
- 37. How do you ensure **safe moving and handling** of residents?

8. General Care & Scenario Questions

38. Can you describe a time when you **worked effectively in a team**?
 39. Can you describe a time when you **handled a difficult or challenging situation** with a resident?
 40. How do you **encourage engagement** in activities for residents with physical or mental health conditions?
 41. How do you ensure **confidentiality** and protect personal information?
 42. How do you deal with **residents refusing care or medication**?
 43. How do you **observe and report changes** in a resident's condition?
 44. Can you give an example of how you **adapted care** to meet an individual's needs?
-

9. Scenario-Based / STAR Questions

45. Describe a situation where you **prevented a fall or accident**.
 46. Describe a time you **supported a resident with diabetes or other long-term condition**.
 47. Describe a time you **helped someone with mental health issues manage their emotions or behaviour**.
 48. Describe a time when you **worked with families or a multi-disciplinary team** to improve care.
 49. Give an example of a time you **noticed a safeguarding concern** and what you did.
 50. Give an example of how you **improved a resident's independence or wellbeing**.
-

Tips for Using These Questions

- Use the **STAR method** for scenario questions (Situation, Task, Action, Result).
- Focus on **person-centred care, safety, and communication**.
- Include **specific examples** from your experience.
- Always show awareness of **policies, procedures, and legal responsibilities**.
